

MINI IONISER

A Unique Reverse Osmosis Water Purifier That Alkalises and Ionises

A Unique 3 in 1 system

Stage 1

Reverse Osmosis which will remove the following contaminants

- Heavy metals
- Pesticides
- Nitrates/Nitrites
- Fluoride
- Oestrogen/Hormones
- Cryptosporidium
- Chlorine
- Lead
- Sulphates
- Plus many more

Stage 2

Re- mineralises & Alkalises

Purifying water by standard reverse osmosis filtration reduces the pH and makes the water more acidic. The **Mini - Ionizer** adds a unique blend of organic natural compounds which re-mineralize the water and give a natural Ph balance. This is the closest to good quality bottled mineral water, at a fraction of the cost

Stage 3

Ionisation

The pure re -mineralised and Alkalised water is Ionised which changes the structure of the water

- Produces powerful Anti- Oxidants- helps to destroy free radicals
- Smaller water clusters- easy absorption
- Alkaline water to reduce acid in the body
- Oxygenated water
- Powerful detoxing action

The Mini Ioniser fits neatly in a cupboard and has its own separate dispenser tap

Technical Data

Unit details

Unit dimensions cm
H 43 W 24.5 D 45

Fits conveniently in a cupboard either upright or on its side

Weight (kg) 6

Power supply - none.
May be required for pumped unit if water pressure low. Please contact for details if unsure.

Water Production

Water production up to 100 litres/day

Built in integral storage tank capacity 7 ltrs
(Fills up automatically)
Additional tanks can be added if required for high usage

Filters & certification

Filter content NSF/Water Quality Association certified

Membrane manufactured by DOW chemical
NSF certified

The Mini Ioniser

Dispenser Tap

Separate tap supplied (option for mixer Tri Flow tap upgrade if preferred)

Maintenance

Filter change requirement
Once every 12 months

Remineralizing & Alkalisng

Minerals added to water automatically
Including Calcium/Magnesium/Potassium
Average water pH value 9.0 to 10.0

Ionisation

Unique system using naturally occurring substances to ionise the water upto -500 ORP
(see Q&A for more details)

Installation

Installation by our own trained and fully insured engineers.
Installation time 60-90 minutes

Warranty- 12 months

(Extended warranty & maintenance programme available – see below)

Costs

RRP £649- **includes full installation & demo**

12 month payment plan

£301 deposit then 12 months at £29.00

Rental plan

£149 1st payment then £29/month for 36 months
Includes all filter changes & any repairs /spares

Filter changes (costs not applicable for rental) (Yearly)

Self change- we post to you £ 129.00
Our engineer to change £ 159.00

Extended Warranty& Maintenance programme

(For purchased models)

£12.99 per month

Includes all filter changes, repairs and spares
